Universal Pallet Supply, Inc. ISO 9001:2000 Certification

Local Pallet Manufacturer receives ISO 9001:2000 Certification

Elkhart, Indiana – 22-September-2008 – Universal Pallet Supply, Inc. today announced that it has recently earned ISO 9001:2000 certification for its New Pallet Production facility in Elkhart, Indiana. The certificate confirms that Universal Pallet Supply, Inc.'s internal quality management system complies with ISO 9001:2000 requirements. Adopted in 1987 by the International Organization for Standardization in Geneva, Switzerland, the ISO quality system was developed in order to establish an internationally recognized standard of quality. It examines all processes of a product development lifecycle including: design, development, and technical support.

To become ISO 9001:2000 certified, Universal Pallet Supply developed and implemented a thorough Quality Management System that conforms to the strict requirements of the ISO standards. Universal Pallet Supply, Inc. has been fundamentally committed to Total Quality Management (TQM) since the company's inception, ensuring that Universal Pallet Supply, Inc.'s products and services are of consistently high quality.

"The overall goal of Universal Pallet Supply's ISO certification project is complete customer satisfaction," notes Charles C. Raiff, the Project Manager of Universal Pallet Supply, Inc. "We believe that ISO will help Universal Pallet Supply continue to maintain the level of excellence required in today's marketplace". As an ISO 9001 certified company, Universal Pallet Supply, Inc. has raised the standards of its organizational discipline, maintaining its position as the region's premier pallet manufacturer.

Universal Pallet Supply started the ISO 9001:2000 certification process in early 2008. Certification was awarded by Global Management System Registration, LLC, an accredited certification body on September, 19, 2008, after a thorough audit of quality management system. In the future, surveillance audits will be performed at least every twelve months from the date of certification to ensure maintenance of standards.
